

TAKKO

To Whom It May Concern:

We had pleasure to collaborate with company Konstruktor Konsalting on project Stop Shop in Valjevo and Niš.

On this projects Konstruktor was general contractor for retail park and also executed fit out works for shop Takko.

We can recommend Konstruktor as company that has experience in fit out works for shops and commercial buildings.

They work as an team, with engineers for all fields that can prepare design and organize delivery of materials and control works on site.

Konstruktor executed works in satisfying quality, according standards and planned time schedule.

We expect that you will have good cooperation with this company because of their experience, knowledge and hard work, on same way that we had on this projects.
